Information on the EU Packaging and Packaging Waste Regulation (EU) 2025/40 on Packaging and Packaging Waste

Dear Sir or Madam,

This letter provides general information on how thermofin GmbH addresses the requirements of Regulation (EU) 2025/40 on packaging and packaging waste, referred to as the PPWR.

thermofin GmbH has incorporated the implementation of the relevant requirements into its existing internal processes. The packaging and packaging materials used are recorded, assigned to the relevant packaging types and assessed against the requirements currently applicable or becoming applicable in the future.

In particular, thermofin GmbH considers:

- the composition of the packaging materials used,
- the applicable restrictions on substances,
- the recyclability of packaging,
- the use of packaging materials according to actual needs,
- the applicable labelling and traceability requirements,
- the relevant statutory transitional periods and application dates.

The necessary information and evidence are obtained and internally assigned to the relevant packaging materials and packaging. Changes to materials, packaging designs or legal requirements are reviewed through thermofin GmbH's internal processes and reflected in the documentation where necessary.

For packaging for which thermofin GmbH assumes manufacturer responsibility, the required conformity assessments are carried out, and the legally required documentation is prepared, kept up to date and retained. For packaging from other manufacturers, thermofin GmbH takes the respective applicable obligations into account.

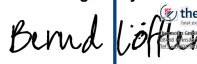

The Technical Documentation and the EU Declaration of Conformity are maintained internally in accordance with the statutory requirements and are made available to the competent authorities upon reasoned request. The PPWR does not provide for the general disclosure of the complete Technical Documentation or the EU Declaration of Conformity to customers or other business partners. Requests relating to individual packaging or deliveries are reviewed by thermofin GmbH on a case-by-case basis.

This letter is provided for general information on the implementation of the PPWR at thermofin GmbH. It does not constitute an EU Declaration of Conformity for any specific packaging, packaging configuration, delivery or individual order.

Should you have any questions, please do not hesitate to contact us.

Kind regards

DS
